

Frontend Web Development Tasks & Instructions

- **TASK 1: Professional LinkedIn Announcement**
 - **Objective:** Share your official internship acceptance on your professional network.
 - **Requirements:** Post a high-resolution copy of your official **Internship Offer Letter** on LinkedIn. Craft a compelling caption detailing your learning goals, tag **Progree**, and use hashtags: `#frontendweb` `#javascript` `#css` `#progree`
- **TASK 2: Interactive Pricing Calculator Web Application**
 - **Objective:** Code a responsive single-page visual calculator interface handling calculation adjustments.
 - **Requirements:** Write structural HTML forms styled with custom CSS layout models. Build JavaScript logic functions that accept numerical data inputs, apply conditional math formulas (e.g., tax additions or dynamic volume discounts), and dynamically update DOM elements without refreshing pages.
- **TASK 3: Multi-Category Product Grid Marketplace UI with Client-Side Filtering**
 - **Objective:** Create a multi-column e-commerce storefront display grid with robust interactive features.
 - **Requirements:** Ingest a local JSON catalog listing and render product cards dynamically using looping components. Build text searching fields, multi-criteria category checkbox filters, price sorting sliders, and manage a local checkout shopping cart state array using the browser's local storage features.
- **TASK 4: Mini Project - Enterprise Dashboard Management Portal with Real-Time JSON Streaming**
 - **Objective:** Architect a full-scale administration workspace layout managing visual analytical data components.
 - **Requirements:** Build a dashboard portal using modern frontend routing frameworks. Integrate data chart components to visualize incoming JSON metric values, build multi-column data sorting systems, and implement a secure token validation state engine for simulated login verification workflows.
